Rates of Services

DNA Core Facility is providing the analytical services at the following rates.

| Services Type | Details | Service Code | Sample Type | Proposed Unit Rate (US\$) |
|--|----------------------------|--------------|----------------------------------|---------------------------|
| DNA Sequencing (including sequencing PCR and purification afterward) | Sequencing upto 16 samples | Seq-16 | Purified PCR products or Plasmid | 10.0 |
| | Sequencing upto 32 samples | Seq-32 | Purified PCR products or Plasmid | 9.75 |
| | Sequencing upto 48 samples | Seq-48 | Purified PCR products or Plasmid | 9.50 |
| | Sequencing upto 64 samples | Seq-64 | Purified PCR products or Plasmid | 9.25 |
| | Sequencing upto 80 samples | Seq-80 | Purified PCR products or Plasmid | 9.00 |
| | Sequencing upto 96 samples | Seq-96 | Purified PCR products or Plasmid | 8.75 |
| DNA Sequencing (excluding sequencing reaction) | Sequencing | Seq-RR | Purified PCR products or Plasmid | 6.0 |
| Fluorescently labelled DNA fragment analysis (GeneScan) | Fragment Analysis | FA | Purified PCR products | 6.0 |

Note: Concessional rates for more than 16 samples will be for the samples with single primer. Normal rates will be charged if samples are to be sequenced with multiple primers.
